

Four CORS to Be Added in Vermont

The Vermont Agency of Transportation is in the process of purchasing four additional CORS. These stations will ideally be located in Middlebury, Dorset-Danby, Woodford-Searsburg and Eden.

Preliminary recon has started and Middlebury College and the Eden Central School have been identified as potential sites. If anyone is aware of suitable sites in the Dorset-Danby or Woodford-Searsburg areas, please contact Dan Martin dan.martin@noaa.gov.

Minimum site requirements for CORS include:

- Brick/masonry building (preferably 2 story or less)
- Publicly owned (preferred)
- Access to internet
- Open view to the sky
